

ABSTRACT OF THE INVENTION

A deck of rock, paper, scissors playing cards and methods of play therewith are disclosed. The deck has fifty-two cards including four wild cards identified as little sister cards and little brother cards, and forty-eight cards including fourteen paper cards, fourteen rock cards, fourteen scissor cards, two crumpled paper cards, two broken rock cards, and two broken scissors cards. Each of the cards has a point value.

The associated method includes playing the cards against each other wherein the cards have a hierarchy based on the pictorial. The hierarchy determines the winner of each game. The cards having point values for determining the points awarded for each card.
